

PacketViper Named to Carahsoft ITES-SW2 Contract to Support U.S. Army Enterprise Infrastructure Goals

PacketViper Teams with Carahsoft to Provide Deception-Based Cyber Threat Detection, Prevention and Response Tools to Federal Government

Pittsburgh, PA – June 2, 2021 - PacketViper, a leading provider of transformative deception-based cybersecurity solutions for IT and OT, today announced that it has been named a manufacturer on the Information Technology Enterprise Solutions – Software 2 (ITES-SW2) contract for the [U.S. Army Computer Hardware Enterprise Software and Solutions \(CHESS\)](#). This contract is held by [Carahsoft Technology Corp.](#), The Trusted Government IT Solutions Provider®, and is effective through August 30, 2025.

ITES-SW2 is a firm-fixed price, indefinite delivery/indefinite quantity contract vehicle for commercial off-the-shelf software products, related services and hardware. The contract has no fees, and ordering is open to all Army, DoD and Federal agencies as well as authorized systems integrators on a worldwide basis. Under this contract, Carahsoft provides software, software maintenance and any necessary hardware from PacketViper to support Federal agencies' enterprise infrastructure goals.

“We are honored and proud to offer our Deception360™ solution through Carahsoft on this contract in support of the U.S. Army mission to deliver better cybersecurity outcomes against global adversaries,” said Ken Wolf, President and COO of PacketViper. “Understanding we are constantly engaged in a real-time cybersecurity battle, the innovations available via this contract can help the Army cost-effectively, and more aggressively defend military networks.”

PacketViper's Deception360 actively defends networks with deception-based threat detection, prevention and automated response to both external and internal cyber threats. Deception is a dynamic mainstay for attackers and Deception360 turns the tables on threats at the earliest stages of their attack cycle. Threat detection is equally effective against known and unknown threats and Deception360 is well aligned with many popular security control frameworks such as NIST, NERC CIP and MITRE ATT&CK.

PacketViper's Deception360 software and any required hardware are available through Carahsoft's ITES-SW2 Contract W52P1J-20-D-0042. For procurement information, contact Carahsoft's ITES-SW2 contract team at (703) 871-8681 or ITES-SW2@carahsoft.com; or visit Carahsoft's dedicated [ITES-SW2 contract resource center](#). To learn more about PacketViper's offerings under ITES-SW2, contact the Carahsoft PacketViper Team at 888.66.CARAH or Niklus.Cesena@carahsoft.com.

About PacketViper

PacketViper has transformative and trusted cybersecurity solutions for organizations seeking better security outcomes across converging OT & IT networks. Deception360 is deception-based, agentless solution that provides active threat detection, prevention and response without complex orchestrations. PacketViper customers cover multiple public and private sector industries.
